

Reporting and Transaction Support

At Kingston Smith corporate finance we provide the following reporting and transaction support services:

- Due diligence and financial investigations tailored to meet your precise needs
- Preparation of business plans tailored to both your business and the requirement of the anticipated sources of finance
- Confidential business review and viability reports for banks and other lending institutions
- Reporting Accountants role
- Pre-lending reviews for financial institutions.

We won the Reporting Accountant of the Year award on PLUS in 2008.

We act for many public companies that we have taken through the listing process. We have excellent working relationships with the NOMADS and other professionals involved in the New Issue, Introduction or Flotation process and aim to take our clients through the process painlessly and efficiently. We are often required to assist in the flotation process by providing lead or debt advisory advice alongside the reporting assignments.
